

Doubling the Benefits of Virtualisation

A Seminar for IT Decision Makers

Implementing Virtualisation solutions can provide many benefits to your organisation. However with new offerings from Microsoft and Citrix, selecting the correct solution requires careful consideration. In this session we will provide clear and concise evidence that proves that VMware, is and will continue to be, the first choice for companies seeking the best-of-breed in virtualisation solutions.

We will also introduce the latest range of next generation feature-rich storage solutions that are easy to deploy and maintain.

We will conclude with a comprehensive demonstration of a 'real-world' scenario of a virtualised application and storage solution that achieves "double-green" savings in power, space and cooling with significantly reduced administrative overheads.

Early booking is advisable

We look forward to welcoming you at our event

Date: 23rd September 2009
Time: 9:30am - 1:30pm (including light refreshments)
Location: Malmaison Hotel 1 Swinegate Leeds LS1 4AG
